THE SITUATION

Our client is a **well-known and experienced astrologer in Jabalpur**, offering expert guidance in Vastu and Astrology. As a local service business, most new clients discover the practice through **Google Search and Google Maps**. For the past **12 months**, we have consistently managed and optimized the client's Google Business Profile to strengthen local visibility, maintain top search rankings, and drive genuine customer enquiries through calls, profile visits, and direction requests.

WHAT WE DID

- Kept the Business Profile fully consistent — accurate NAP (Name, Address, Phone), categories, service details and hours maintained without gaps over 12 months.
- Regular posting, photo updates and profile activity to keep the listing active in Google's eyes.
- Ongoing optimisation of the listing to build and hold a #1 local ranking position in Jabalpur.
- Monitored and responded to profile engagement (calls, direction requests, chat clicks) to keep the profile signal strong.

PERFORMANCE TREND — WHAT THE GRAPHS SHOW

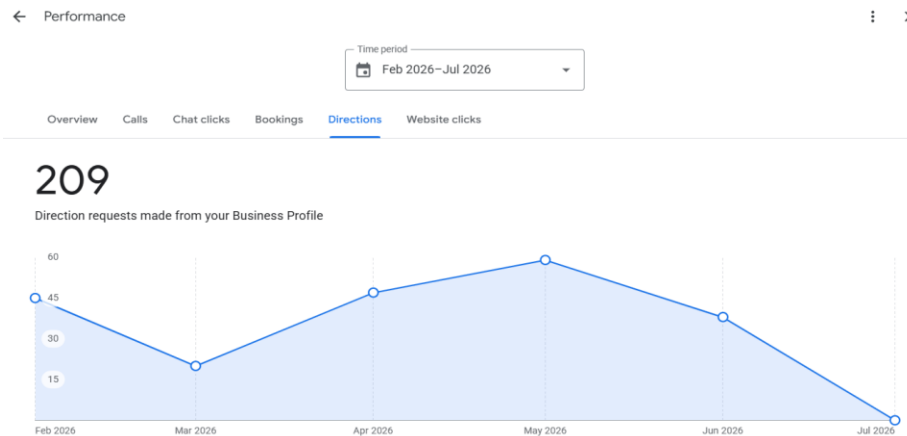

Overview interactions climbed steadily from February through a peak in May 2026 (with June 2026 alone recording 69 interactions), reflecting sustained visibility from consistent profile management. Calls followed the same pattern, rising from roughly 10/month in February to a peak of 37 in May. Direction requests peaked in the same window, indicating a real increase in people choosing to visit in person.

Directions — 209 total direction requests

WHY IT WORKED

- Consistency, not one-off fixes — the profile has been maintained without gaps for a full year, which Google rewards with sustained local ranking.
- The #1 ranking position in Jabalpur has been held, not just achieved once, which is what converts into repeatable calls and direction requests month after month.
- Growth is visible across every profile action — calls, directions and total interactions all trend up together, showing the ranking is translating into real client contact, not just impressions.
